ABOUT ME

Flutter-focused Software Engineer experienced in building scalable mobile applications and backend systems. Strong foundation in clean architecture, state management (Bloc/Riverpod), REST API integration, and performance optimization. Proven experience leading and deploying production-grade applications serving 18,000+ users within the first 3 months.

SKILLS

- **Languages:** Dart, Python, JavaScript, C, C++, HTML/CSS, PHP
- **Mobile:** Flutter, Flame
- **Backend:** Flask, REST APIs
- **State Management:** Provider / Riverpod / Bloc
- **Databases:** Firebase / PostgreSQL / MySQL
- **Tools:** Git, Linux, Docker
- **Cloud:** Azure, GCP

WORK EXPERIENCE

Onnesok | 2025 - present

Founder & CEO

Founded and led a scalable technology platform serving 18,000+ users in the first 3 months, including BRAC University students and faculty members. Designed system architecture, developed Flutter applications and managed end-to-end product deployment.

BRAC UNIVERSITY | 2024 - present

RS APP DEV INSTRUCTOR

App Development Instructor at BRAC University's Residential Campus, providing hands-on training in mobile app development. Mentors students through the full software development lifecycle, emphasizing clean architecture, teamwork, and industry-ready coding practices.

BRAC SDP | 2025 - present

STUDENT DEVELOPER

Contributing to the SDP ecosystem by improving technical infrastructure and student tools. Focused on creating user-friendly platforms that enhance learning, collaboration, and job search workflows.

Learners Boosters | 2025 - present

CO-FOUNDER & LECTURER

Teaching Flutter and full-stack development through hands-on lessons and projects. Mentors students in coding best practices, interactive learning, and applying skills to real-world applications.

ROBOWAY LABS | 2022 - 2025

FORMER CO-FOUNDER & CTO

Former CTO at Roboway Labs, leading the development of robotics, IoT, and AI-driven solutions from concept to deployment. Directed teams to deliver innovative products including the Pixi humanoid robots, Caarmate app, and Pet Fiddler.

EDUCATION

- **BACHELOR OF SCIENCE | COMPUTER SCIENCE AND ENGINEERING**
BRAC University (Currently studying)
- **HIGHER SECONDARY CERTIFICATE | SCIENCE**
Govt. Bangabandhu college
- **SECONDARY SCHOOL CERTIFICATE | SCIENCE**
S.M. Model Govt. high school

ACHIEVEMENTS

- **Vice Chancellor's Award** – BRAC University, for outstanding innovation & technical excellence.
- **IEEE YESIST12** – International competitor & National Winner (Bionic Arm project).
- **Technoxian World Robotics Challenge** – National Champion.
- **10 Minute School Science Fair** – National Winner (FarmBot project).
- **BDApps Innovation Summit** – 2nd Runner-Up.
- **IoTrix Hackathon** – 2nd Runner-Up.
- **UIHP Competition** – Winner (Bionic Arm project).
- **International Gold Award** – Sensory-feedback Bionic Arm project.
- **Tech Spectra 2.0** – Winner.

PROJECTS

- **TexLab** – Developed a cloud-based LaTeX editor with real-time compilation, project management, and collaborative editing.
- **ROBU App** – Built a full-featured mobile platform with dynamic content modules, authentication, and real-time updates.
- **AURA** – Agentic AI mobile assistant Aura that delivers context-aware conversations by integrating long-term memory, local LLM inference, and intelligent task automation.
- **MCP Browser Server** – Built Flask + Playwright automation server with AI-powered intelligent link selection and scraping.
- **ShooterX** – Engineered high-performance 2D game using Flutter & Flame with collision detection and modular architecture.
- **Adventure of Sui** – Developed pixel RPG with state management, animation system, and scalable level engine.
- **Arduino Labs** – Built mobile-controlled robotic system leveraging smartphone sensors for real-time control & navigation.
- **Learners App** – LLM-based learning management system app for students.
